

Hosting a Static website like portfolio in S3

Create a bucket

To create a bucket Sign in to the AWS Management Console and open the Amazon S3 console at

In the left navigation pane, choose General purpose buckets.

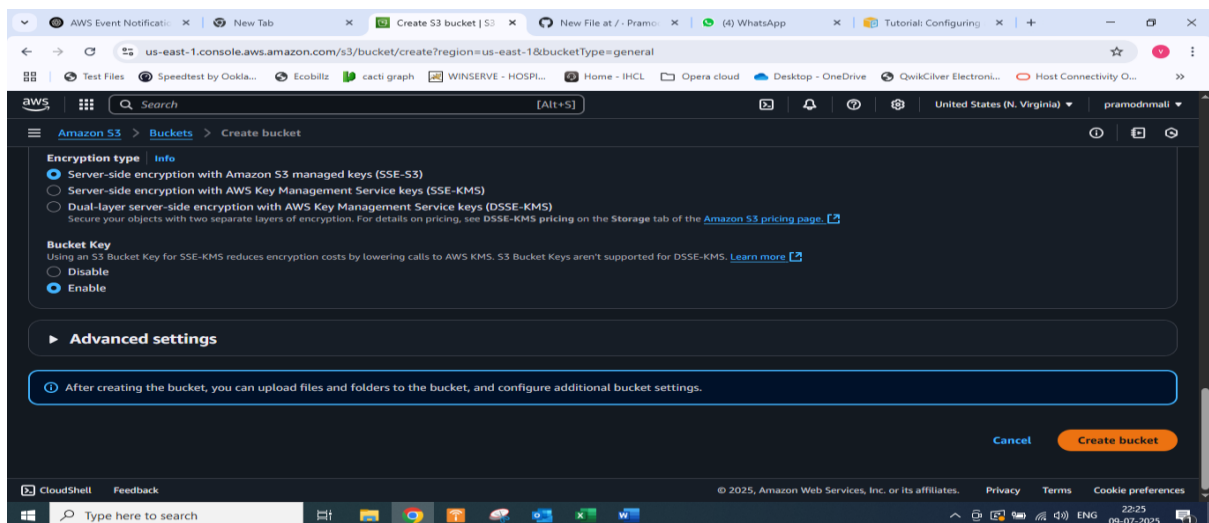

#

Enter the **Bucket name**

Click on create a bucket

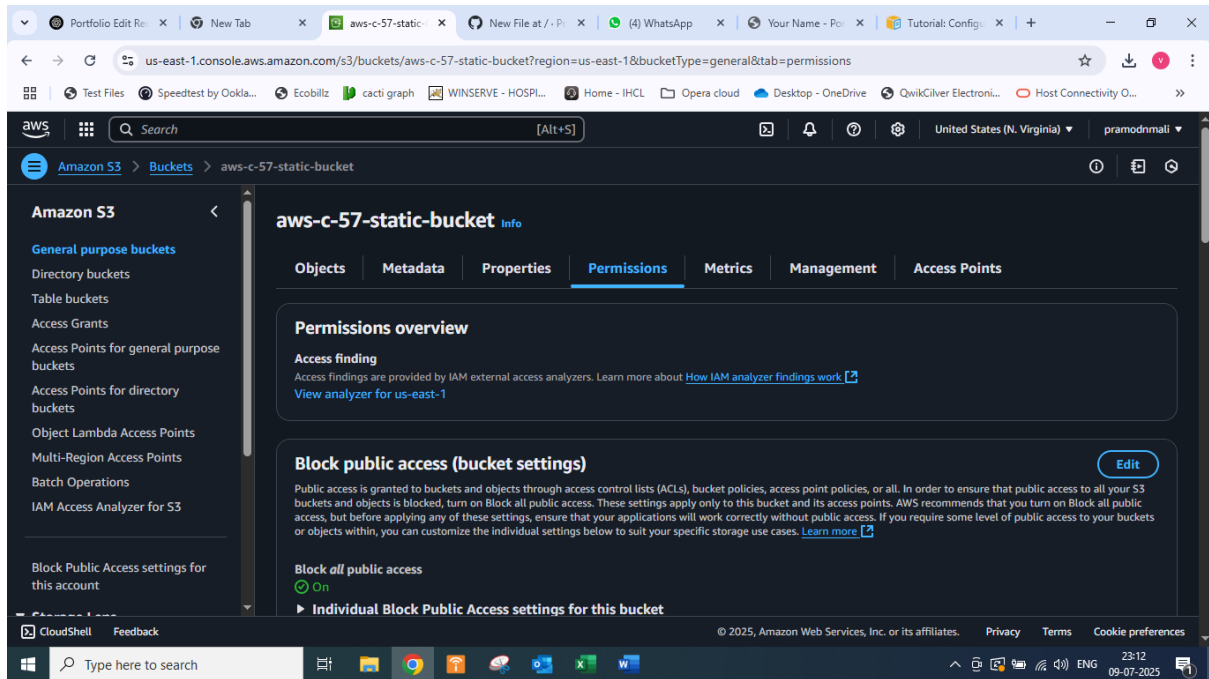

#

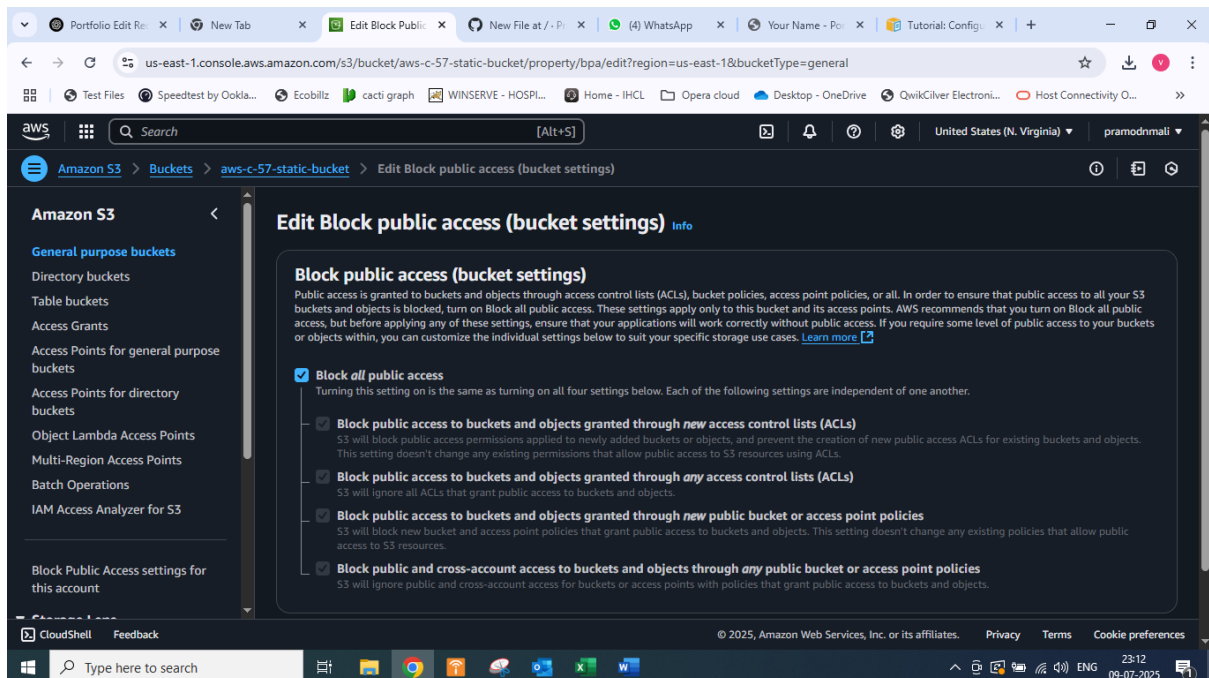

Now click on bucket and Upload files index.html,

Add folders of template

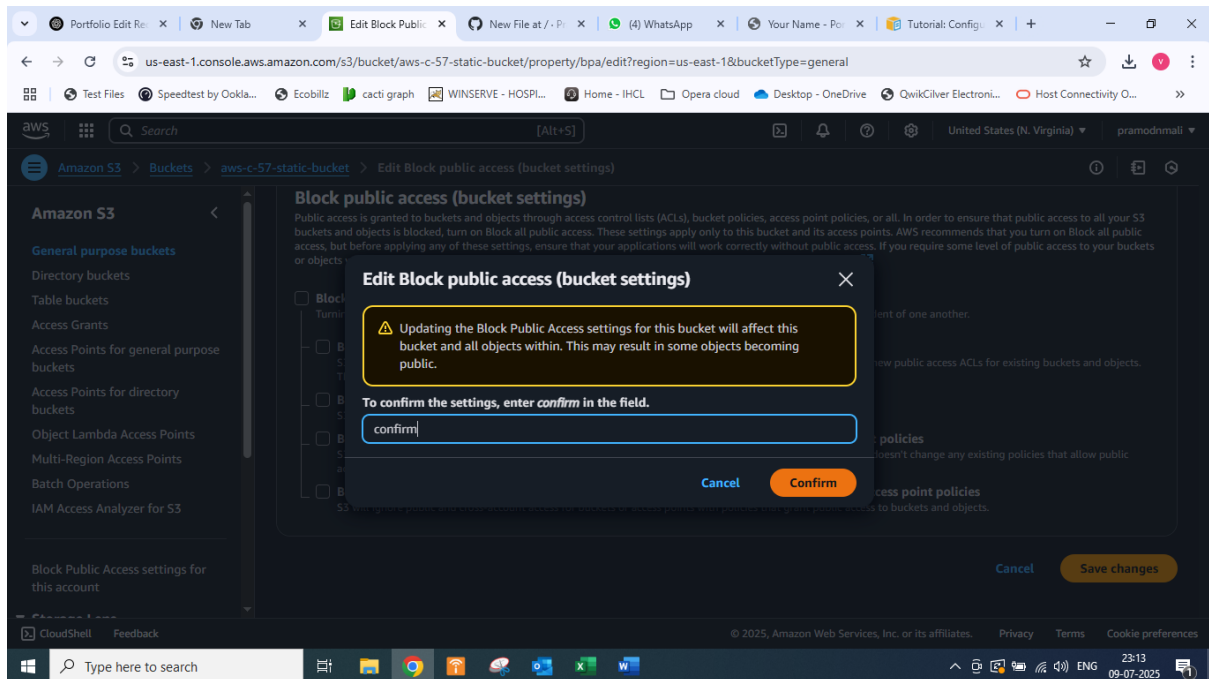

Next go to permissions

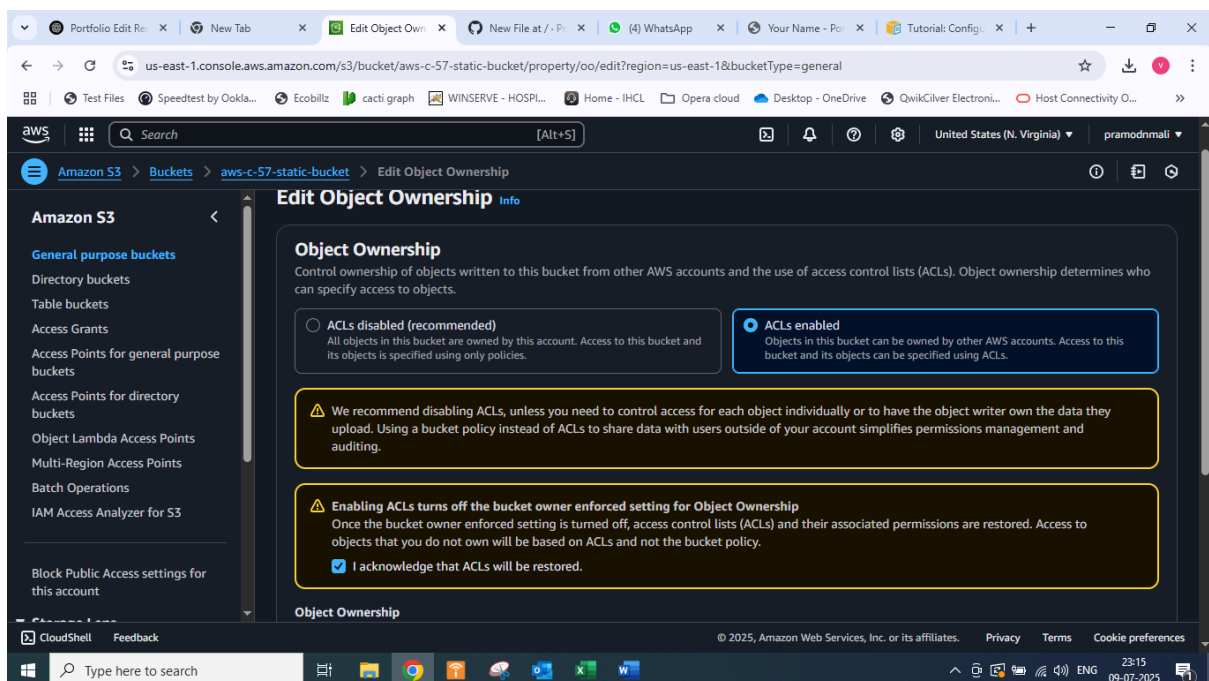

Check out block public access

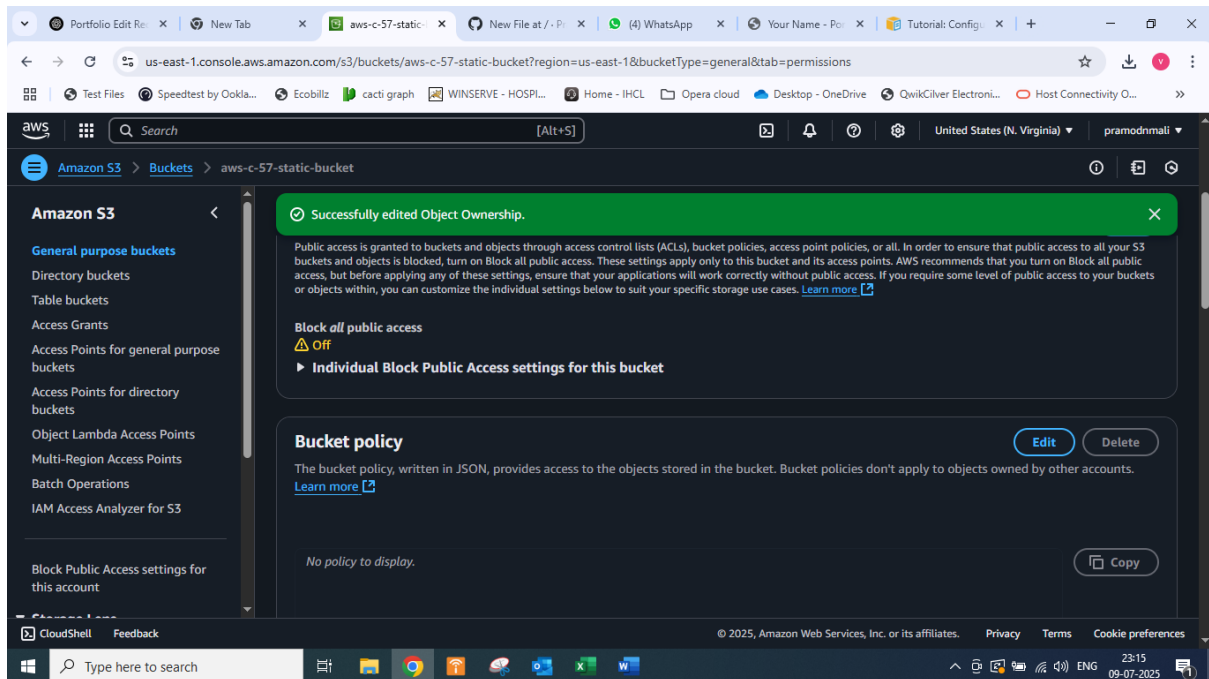

#

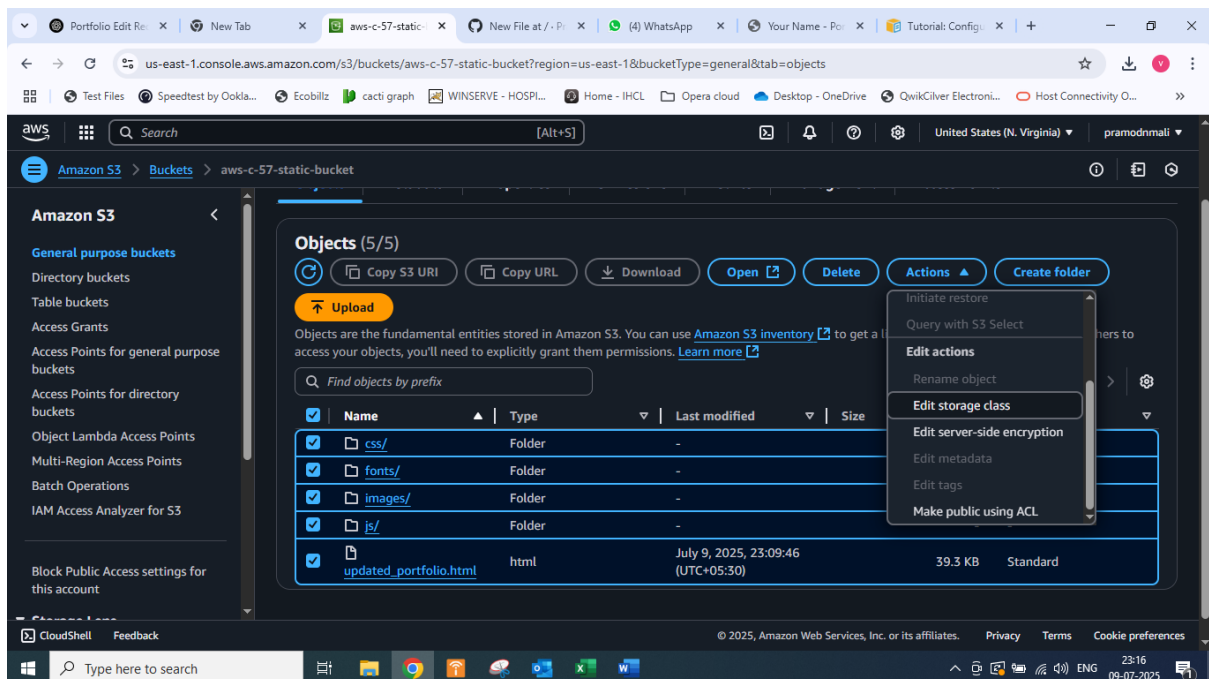

Next go to Object ownership

#

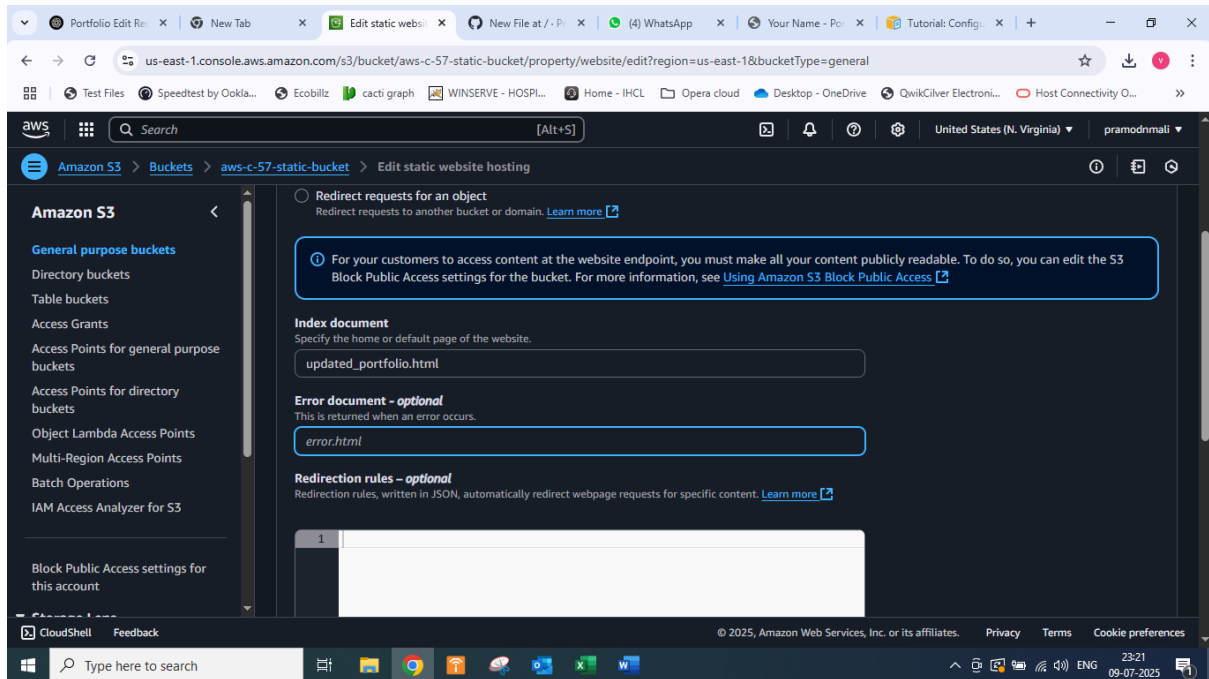

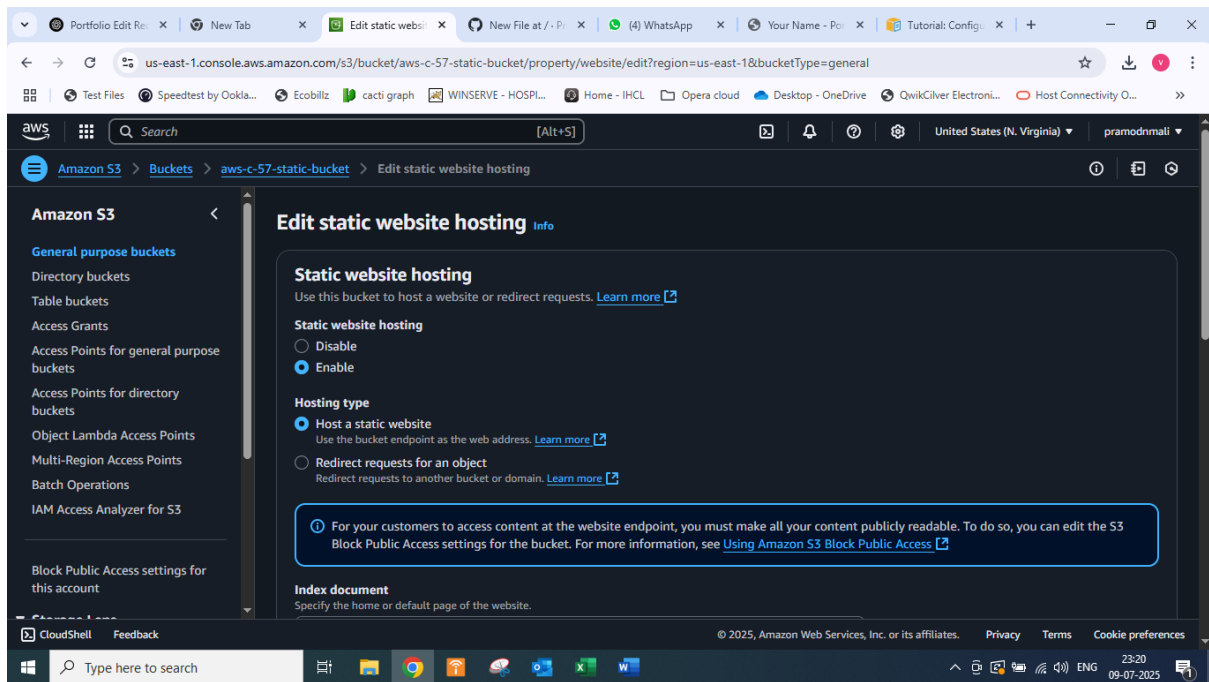

Next have to make all the objects public

Next go to properties

Edit Static website hosting

Make it enable

Will get one URL of website

Next hit it on browser
